

Jolly Jumper

Problem ID: jollyjumper

A sequence is a jolly jumper if the absolute differences between successive elements contain all integers from 1 to $n - 1$ exactly once.

Input

Firs line contain an integer n number of test cases. Each line of test case contains an integer n followed by n integers. Input continues until end of file (EOF).

Output

For each sequence, output `Jolly` if the sequence is a jolly jumper, otherwise output `Not jolly`.

Constraints

- Time Limit: 1 second
- Memory Limit: 256 MB

Sample

Sample Input 1	Sample Output 1
2 4 1 4 2 3 5 1 4 2 -1 6	Jolly Not jolly
